Online Book Borrowing Platform

Explanation Video

Project Theme

A seamless and modern web application designed to digitize the traditional library experience. Users can explore a vast collection of books, filter by categories, and borrow titles digitally. The platform prioritizes security and performance using **BetterAuth**, **Next.js**, and **MongoDB**.

Key Things you have must to do

- **GitHub Commits:** Include at least 10 meaningful commits with descriptive messages.
 - **Readme.md:** Include a README file with the project name, purpose, live URL, key features, and any npm packages you have used.
 - **Responsiveness:** Ensure the website is fully responsive on mobile, tablet, and desktop.
 - **Environment Variables:** Secure configuration keys using environment variables.
 - **Unique Design:** Create a unique design that goes with the given Concept. You can use this [blog](#) for these kinds of resources
 - **Host your Application:** You can choose deployment systems like vercel, render for hosting . As you are developing a single page application
 - ensure that page doesn't throw any error on reloading from any routes.
-

Main Requirements

1. Layout Structure

- **Header (Navbar):** * **Left:** Website Logo (links to Home).
 - **Center:** Navigation links for **Home**, **All Books**, and My Profile.
 - **Right:** Conditional rendering—If logged out, show **Login**. If logged in, show the **User's Name** and a **Logout** button.
- **Footer:** A custom-designed footer featuring social media links and a "Contact Us" section.

2. JSON Data Generation

To create data , use the following structure:

```
{  
  
id,  
  
title,  
  
author,  
  
description,  
  
category,  
  
available_quantity,  
  
image_url  
}
```

You can use this as a prompt for ChatGPT/Gemini:

"Generate a JSON array of 12 book objects. Each object must include: **id**, **title**, **author**, **description**, **category** (choose from Story, Tech, Science), **available_quantity** (integer), and **image_url**."

3. Home

- **Banner:** A large "Find Your Next Read" heading with a "**Browse Now**" button leading to the All Books page.

- **Marquee:** A scrolling line of text showing "New Arrivals: [Book Name] | Special Discount on Memberships..."
- **Featured Books:** A section showing the top 4 books fetched from the server(json-server/local data). Each card must have a "**View Details**" button.
- Add two more extra sections. Implement them with your own ideas.

4. Authentication

User Login

The user will show a Login page with a form, so that the user can Log in this application.

- Show a Title for Login. & Form with following fields
(Email , Password , Login button)

If the user Login successfully then

- navigate him to his Home page.
- If not, show him an error with toast / error message anywhere in the form.

There will be some other options like

- Show the user a Link for Register so that he can go to the register page.
- Show users a Social Login Button (Google only) . on Clicking it
 - user authenticate with Google
 - Navigate him to his Home page.

User Registration

Create a register page with a form, so that the user can register himself in this application.

- Show a Title for registration and a Form with following fields
(Name , Email, Photo-url(link), Password & Register Button)

If the user Register successfully then

- navigate him to his login page.
- If not, show him an error with toast / error message anywhere in the form.

There will be some other options like

- Show the user a Link for Login so that he can go to the Login page.
- Show users a Social Login Button (Google only) . on Clicking it
 - user authenticate with Google
 - Navigate the user to the Home page.

💡 Don't implement email verification or forget password method as it will inconvenience the examiner. If you want, you can add these after receiving the assignment result.

5. All Books Page

- **Search Bar:** A large input at the top to search for books by title.
- **Book Cards:** Display:
 - Book Image & Title.
 - **"Details" Button:** Navigates to the specific Book Details page.

6. Single Book Details Page(PRIVATE ROUTE)

- **Access:** Only logged-in users can view this
- **Visuals:** Large Book Cover on the left, text/details on the right.
- **Info:** Title, Author, Description, and **Available Quantity** (e.g., "5 copies left").
- **The Action Button:**
 - **"Borrow This Book" Button:**
 - If **Logged Out:** Redirects to the Login page.
 - Show a confirmation toast.

7. My Profile(PRIVATE ROUTE)

- **Access:** Only logged-in users can view this

- Show all user information

Challenges

1. Update Information Feature

- In My Profile route there will be an update button. On clicking it, Take user to another route
 - Show user a form with 2 input field (image and Name)
 - An Update Information button.

Follow this documentation:

<https://better-auth.com/docs/concepts/users-accounts#update-user>

2. Category Sidebar: A functional left sidebar on the "All Books" page to filter books by category(e.g., Story, Tech, Science).

3. Implement any one npm package from the following

- [Animate.css](#),
- [React-Spring](#)
- [swiperjs](#)

Tech Stack:

- **Next JS**
- **Tailwind CSS**
- **DaisyUI/HeroUI**
- **BetterAuth**
